01 · PROBLEM & CUSTOMER

Every app is a new interface to learn. A phone call isn't.

Buttons move, icons change, and most older adults stop trying. The work falls to family. Gary runs modern services through the interface they already know.

WHO FEELS IT Adults 75+ living independently, and the adult children who become their tech support and fraud filter.

WHY IT HURTS Waiting on a son to order groceries. Skipping appointments because booking a ride is hard. Losing money to scams that exploit the same confusion.

WHO WE SELL TO Adult children 45–65 who pay · seniors living alone on a landline or basic phone · later, senior living and home-care operators.

A Phone Call That Can Act

FRAUD AGAINST 60+ IS SURGING

PAUSE, THEN ASK FAMILY

CAREGIVERS ARE STRETCHED

WHY A PHONE CALL

- 95%** of adults 65+ own a cell phone. A call reaches almost all of them.
- 22%** of adults 65+ have no smartphone, so app-based help misses them.
- 42%** of adults 65+ prefer a call over a text. No other age group does.
- 60%** of adults 65+ say tech isn’t designed with their age in mind.

“My grandma calls for everything. The pharmacy, the bank, the doctor, us. A phone call is the one thing she never has to think about. So that’s what Gary is.”
Advait Chalke

WHY SIMILAR PRODUCTS MISS

Product	What it does	What’s missing
Meela	AI companion calls; books rides; ~\$40/mo	Doesn’t pay bills, order food or stop scams
ElderVoice	Daily AI check-in calls; texts family on distress	Checks in only; can’t act on a request
Lively	Senior phones, urgent help, rides; \$15–50/mo	Doesn’t pay bills, order food or stop scams
Gary	One call to pay, order, book or ride	Nothing. Family OKs risky money.

Market: ~16M seniors living alone × \$30/mo ≈ \$5.8B/yr (hypothesis).

What we learned: the parent wants independence without a new device; the family wants visibility and a veto on risky money.

Call Gary. Say what you need. Gary does it. Family sees it.

 **Call with Gary**

Order wings from Wingstop.

Buffalo Spicy Wings, \$14.56. Should I place it?

Yes.

 **Family alerts**

Mom wants to send \$500 to a new payee, "IRS Agent." Approve? YES / NO

NO

Cancelled. I've told Mom.

Demo: a live phone call, with the browser on screen as Gary finds the store, fills the cart and places the order.

BUILT THIS WEEKEND

-  **LIVE CALLS** both ways on Twilio and Deepgram. Verified on real phones: inbound questions and outbound reminder calls.
-  **FAMILY LOOP** risky requests go to family on WhatsApp or the dashboard, and the answer is spoken into the live call.
-  **BROWSER AGENT** orders on a DoorDash clone and books on a TaskRabbit clone: store ~15s, cart ~17s, placed ~8s.
-  **GMAIL AND CALENDAR** sorted into bills, appointments and scams. Missed reminders retry once, then alert family.
-  **SAFETY IN CODE** across four MCP servers: 7 scam patterns and spending limits, plus a read-back and a clear yes before money moves.

No new interface. No new device. Family in the loop by design.

FOR THE SENIOR

Independence on the interface they already use.
Nothing to install, learn or charge.

FOR THE FAMILY

Every action on a dashboard. Risky ones approved by text or a tap. Scams stopped first.

WHY IT'S DIFFERENT

-  **ACROSS SERVICES.** One browser agent drives food and home-service sites instead of waiting on one API at a time.
-  **LEARNS HABITS AND RESTRICTIONS.** Remembers the usual order and saved places, and family can add diet needs like low sodium or no nuts.
-  **SAFETY IN CODE.** Read-back and family approval are enforced by the system, not left to the model.
-  **REACHES 75+.** Including landline users that smart speakers never will.

The family pays for peace of mind.

PRICE HYPOTHESIS

\$25–40

per parent, per month

In the range families already pay for medical-alert and senior-phone plans.

SUBSCRIPTION

B2B2C

TRANSACTION FEE

WHO PAYS. The adult child, monthly, for their parent.

WHY THEY PAY. 64% of caregivers report moderate–high stress. Gary takes the “can you order this” calls, reminders and scam screening off their plate.

SECOND CHANNEL. B2B2C through Medicare Advantage plans, senior living operators and home-care agencies, billed per member.

LATER. A small fee on orders, bookings and rides placed through Gary.

FIRST 100 CUSTOMERS. Caregivers sign up through our built onboarding flow; live call demos at senior centers (11,000 nationwide); one senior-living pilot.

What we would test next.

TEST

Willingness to pay with 20 adult children

Will a senior let a voice agent move money after one read-back?

How much family approval before it becomes friction

BUILD

Cut each step under 8s (first order: 79s to 27s so far)

Check every order against the diet profile

Ride booking on the Uber clone

Model-based scam scoring beyond 7 patterns

OPEN QUESTIONS

Speech recognition on landlines and in noisy rooms

Will callers wait ~15s per step while the browser works?

Whether platforms let an agent act for a user

Who is liable when an approved action goes wrong

They already know how to use the phone. **Gary does the rest.**
